Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary

Application No.

10/565,300

Applicant(s)

TANIZAKI ET AL.

Examiner

Sigmund Tang

Art Unit

2612

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 20 January 2006.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-10 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- ☒ Notice of References Cited (PTO-892)
- ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date 20 January 2006.
- ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____
- ☐ Notice of Informal Patent Application
- ☐ Other: _____

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated over Moroto et al, US Patent No 5,121,326.

Re Claim 1, Moroto discloses a summarized map (Moroto, Figure 4(a); Column 6, Lines 13-49) providing guidance (Moroto, Figure 4(a), "dotted line") along a course in a local area by setting a designated point of departure such as the present position of a vehicle (Moroto, Figure 4(a), "arrow") to a destination (Moroto, Figure 4(a), "Circled X"). Moroto further discloses a summarization degree (Moroto, Column 2, Lines 45-55; "scale ratio") that is set in conformity with the distance between the present position of a vehicle to a destination. Moroto further discloses a detecting means of the present position of a vehicle and calculates present position by means of an inputs, steering angle, and information from a range finder (Moroto, Column 9, Lines 12-34). Note: The labeling of a certain map to be a "summarized map" has no bearing on patentability since there is no claimed contrasting of sizes between said summarized map and another map.

Re Claims 2 and 3, claim 3 is a more narrow than claim 2 wherein a priority is set for the limited number of roads and displayed elements based on a summarization

Art Unit: 2612

degree corresponding to the distance from the present position of a vehicle to a destination. Moroto discloses setting a scale ratio for displaying a greater or smaller range of a map (Moroto, Figure 2) of items and ranks roads (Moroto, Figure 3; Column 5, Lines 53-65) in a priority to be displayed.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4-8 rejected under 35 U.S.C. 103(a) as being unpatentable over Moroto et al, US Patent No 5,121,326 in further view of Katou et al, US Patent No. 6,006,161.

Re Claims 4-7, Moroto fails to disclose a two-display system. Katou discloses an invention in a similar field of endeavors wherein two screens are used in a vehicle navigation system. Katou discloses a two-screen mode (Katou, Figure 5b) wherein a right screen is in a form of a "present-location" map screen (local plane map) wherein the present position of a vehicle is shown with surrounding objects wherein the left screen is used for displaying maps of greater ranges such as a city map or a schematic diagram (Katou, Column 7, Lines 13-20). A person ordinarily skilled in the art would combine the teachings of Katou and Moroto for the benefit of recognizing a positional relationship of a present vehicle location to a destination with divided screens.

Re Claim 8, Moroto already provides the teaching of a contraction scale (scale ratio) set in conformity to the summarization degree of the distance between a present

Art Unit: 2612

location of a vehicle to a destination, as explained in Re Claims 1, 2 and 3. One ordinarily skilled in the art would utilize said Moroto's teaching and applied to any navigational map like a local area map for the purpose simplifying the display and making it easier for a driver of the vehicle to ascertain the course while driving (Moroto, Column 3, Lines 10-22).

5. Claims 9 & 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moroto et al, US Patent No 5,121,326 in further view of Nakayama et al, US Patent No. 5,732,385.

Re Claims 9 & 10, Claims 9 and 10 are identical to claims 1 & 2 – and are addressed equally above – with the exception of the limited amount of roads and display elements as well as a display range are changed in accordance with the running speed of a vehicle instead of the distance between the present position of a vehicle to a destination. However, Moroto discloses a scale ratio of the range of a map dependant upon the distance between a present position of a vehicle and a destination is silent on having said scale ratio dependant upon the vehicle speed. Nakayama discloses the teaching of varion contract scale ratios can be displayed according to the vehicle speed (Nakayama, Column 8, Lines 11-18; Column 13, Lines 30-36).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sigmund Tang whose telephone number is 571-270-1243. The examiner can normally be reached on M-F: 7:30-4:30.

Art Unit: 2612

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffery Hofsass can be reached at 571-272-2981. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
